

# SMART Grid for a SMART Chicago

Modernizing our Electric Grid to Improve our Communities

**CHICAGO RESIDENTS** are among the **FIRST** consumers in Illinois to receive **SMART Meters** from **ComEd** in homes + businesses as part of **SMART Grid** improvements.

## What you need to know:

- ✓ All residents will receive **SMART** meters by 2018. You will be notified by **ComEd** when installations are scheduled for your area.
- ✓ A uniformed meter installer from **ComEd**, with the appropriate identification, will perform your installation at no cost to you.
- ✓ Be sure there is nothing blocking access to your electric meter.

# What are the benefits of **SMART** Grid + **SMART** Meters?

## **Better electricity service with fewer and shorter outages** –

You won't have to call ComEd to tell them when the lights are out once all meters are installed in 2018.

---

## **No more estimated electricity bills** – ComEd will no longer

estimate your usage so you will have more accurate billing.

---

**More pricing options for you** – With your **SMART** meter, you have more pricing options and information available to you for smarter energy use.

City of Chicago  
Mayor Rahm Emanuel
